CONTENTS OF VOLUME 31

Memorial Articles

EFRON, BRADLEY. Robbins, empirical Bayes and microarrays 366–378
LAI, TZE LEUNG. Stochastic approximation 391–406
SIEGMUND, DAVID. Herbert Robbins and sequential analysis 349–365
ZHANG, CUN-HUI. Compound decision theory and empirical Bayes methods 379–390
The publications and writings of Herbert Robbins 407–413

The 2000 Wald Memorial Lectures

REID, N. Asymptotics and the theory of inference 1695–1731

Articles

AKHARIF, ABDELHADI AND HALLIN, MARC. Efficient detection of random coefficients in autoregressive models 675–704
AVERKAMP, R. AND HOUDRÉ, C. Wavelet thresholding for non-necessarily Gaussian noise: Idealism 110–151
BARAUD, Y., HUET, S. AND LAURENT, B. Adaptive tests of linear hypotheses by model selection 225–251
BELITSER, EDUARD AND GHOSAL, SUBHASHIS. Adaptive Bayesian inference on the mean of an infinite-dimensional normal distribution 536–559
BHATTACHARYA, RABI AND PATRANGENARU, VIC. Large sample theory of intrinsic and extrinsic sample means on manifolds. I 1–29
BICKEL, PETER J. AND RITOV, YA'ACOV. Nonparametric estimators which can be "plugged-in" 1033–1053
BRESLOW, NORMAN, MCNENEY, BRAD AND WELLNER, JON A. Large sample theory for semiparametric regression models with two-phase, outcome dependent sampling 1110–1139
BUCHMANN, BORIS AND GRÜBEL, RUDOLF. Decompounding: An estimation problem for Poisson random sums 1054–1074
BULUTOGLU, DURSUN A. AND CHENG, CHING-SHUI. Hidden projection properties of some nonregular fractional factorial designs and their applications 1012–1026
CAI, T. TONY AND LOW, MARK G. A note on nonparametric estimation of linear functionals 1140–1153
CANDÈS, EMMANUEL J. Ridgelets: Estimating with ridge functions 1561–1599
CHEN, DECHANG, HUANG, PENG AND CHENG, XIUZHEN. A concrete statistical realization of Kleinberg's stochastic discrimination for pattern recognition. Part I. Two-class classification 1393–1412
CHEN, MING-HUI AND SCHMEISER, BRUCE W. Discussion 742–743

CHENG, CHING-SHUI AND BULUTOGLU, DURSUN A. Hidden projection properties of some nonregular fractional factorial designs and their applications 1012–1026
CHENG, XIUZHEN, CHEN, DECHANG AND HUANG, PENG. A concrete statistical realization of Kleinberg's stochastic discrimination for pattern recognition. Part I. Two-class classification 1393–1412
CHIAROMONTE, FRANCESCA, LI, BING AND COOK, R. DENNIS. Dimension reduction for the conditional mean in regressions with categorical predictors 1636–1668
CLAESKENS, GERDA AND VAN KEILEGOM, INGRID. Bootstrap confidence bands for regression curves and their derivatives ... 1852–1884
CLERC, MAUREEN AND MALLAT, STÉPHANE. Estimating deformations of stationary processes 1772–1821
CONSONNI, GUIDO AND VERONESE, PIERO. Enriched conjugate and reference priors for the Wishart family on symmetric cones 1491–1516
COOK, R. DENNIS, CHIAROMONTE, FRANCESCA AND LI, BING. Dimension reduction for the conditional mean in regressions with categorical predictors 1636–1668
DE HAAN, LAURENS AND LIN, TAO. Weak consistency of extreme value estimators in $C[0, 1]$ 1996–2012
DE WOLF, P. P., GROENEBOOM, P. AND LOPUHAÄ, H. P. Kernel-type estimators for the extreme value index 1956–1995
DESOLNEUX, AGNÈS, MOISAN, LIONEL AND MOREL, JEAN-MICHEL. Maximal meaningful events and applications to image analysis 1822–1851
DETTE, HOLGER AND MELAS, VIATCHESLAV B. Optimal designs for estimating individual coefficients in Fourier regression models 1669–1692
DETTE, HOLGER AND NEUMEYER, NATALIE. Nonparametric comparison of regression curves: An empirical process approach 880–920
DIPPON, JÜRGEN. Accelerated randomized stochastic optimization 1260–1281
DOWNS, OLIVER B. Discussion 743–748
DUCHARME, GILLES R. AND LEDWINA, TERESA. Efficient and adaptive nonparametric test for the two-sample problem..... 2036–2058
FORT, GERSENDE AND MOULINES, ERIC. Convergence of the Monte Carlo expectation maximization for curved exponential families 1220–1259
FUH, CHENG-DER. SPRT and CUSUM in hidden Markov models 942–977
FUKUMIZU, KENJI. Likelihood ratio of unidentifiable models and multilayer neural networks 833–851

GHOSAL, SUBHASHIS AND BELITSER, EDUARD. Adaptive Bayesian inference on the mean of an infinite-dimensional normal distribution 536–559
GIRAITIS, L. AND ROBINSON, P. M. Edgeworth expansions for semiparametric Whittle estimation of long memory 1325–1375
GRACZYK, PIOTR, LETAC, GÉRARD AND MASSAM, HÉLÈNE. The complex Wishart distribution and the symmetric group ... 287–309
GROENEBOOM, P., LOPUHAÄ, H. P. AND DE WOLF, P. P. Kernel-type estimators for the extreme value index 1956–1995
GRÜBEL, RUDOLF AND BUCHMANN, BORIS. Decompounding: An estimation problem for Poisson random sums 1054–1074
HALL, PETER AND MOLCHANOV, ILYA. Sequential methods for design-adaptive estimation of discontinuities in regression curves and surfaces 921–941
HALL, PETER AND YAO, QIWEI. Inference in components of variance models with low replication 414–441
HALL, PETER AND ZHOU, XIAO-HUA. Nonparametric estimation of component distributions in a multivariate mixture 201–224
HALLIN, MARC AND AKHARIF, ABDELHADI. Efficient detection of random coefficients in autoregressive models 675–704
HEDAYAT, A. S. AND YANG, MIN. Universal optimality of balanced uniform crossover designs 978–983
HOFF, PETER D. Nonparametric estimation of convex models via mixtures 174–200
HÖSSJER, OLA. Asymptotic estimation theory of multipoint linkage analysis under perfect marker information 1075–1109
HOUDRÉ, C. AND AVERKAMP, R. Wavelet thresholding for non-necessarily Gaussian noise: Idealism 110–151
HUANG, PENG, CHENG, XIUZHEN AND CHEN, DECHANG. A concrete statistical realization of Kleinberg's stochastic discrimination for pattern recognition. Part I. Two-class classification 1393–1412
HUANG, JIANHUA Z. Local asymptotics for polynomial spline regression 1600–1635
HUET, S., LAURENT, B. AND BARAUD, Y. Adaptive tests of linear hypotheses by model selection 225–251
INGLOT, TADEUSZ AND KALLENBERG, WILBERT C. M. Moderate deviations of minimum contrast estimators under contamination 852–879
JANSSEN, ARNOLD AND PAULS, THORSTEN. How do bootstrap and permutation tests work? 768–806

JEWELL, NICHOLAS P. AND VAN DER LAAN, MARK J. Current status and right-censored data structures when observing a marker at the censoring time 512–535
JING, BING-YI AND WANG, QIYING. Edgeworth expansion for U-statistics under minimal conditions 1376–1391
KALIFA, JÉRÔME AND MALLAT, STÉPHANE. Thresholding estimators for linear inverse problems and deconvolutions 58–109
KALLENBERG, WILBERT C. M. AND INGLOT, TADEUSZ. Moderate deviations of minimum contrast estimators under contamination 852–879
KIM, YONGDAI AND LEE, JAEYONG. Bayesian analysis of proportional hazard models 493–511
KIM, YONGDAI AND LEE, JAEYONG. Bayesian bootstrap for proportional hazards models 1905–1922
KITAMURA, YUICHI AND TRIPATHI, GAUTAM. Testing conditional moment restrictions 2059–2095
KOLASSA, JOHN E. Multivariate saddlepoint tail probability approximations 274–286
KOSHEVOY, GLEB A., MÖTTÖNEN, JYRKI AND OJA, HANNU. A scatter matrix estimate based on the zonotope 1439–1459
KOZEK, ANDRZEJ S. On M-estimators and normal quantiles 1170–1185
KREISS, JENS-PETER AND PAPARODITIS, EFSTATHIOS. Autoregressive-aided periodogram bootstrap for time series 1923–1955
LAHIRI, S. N. A necessary and sufficient condition for asymptotic independence of discrete Fourier transforms under short- and long-range dependence 613–641
LAURENT, B., BARAUD, Y. AND HUET, S. Adaptive tests of linear hypotheses by model selection 225–251
LEDWINA, TERESA AND DUCHARME, GILLES R. Efficient and adaptive nonparametric test for the two-sample problem 2036–2058
LEE, JAEYONG AND KIM, YONGDAI. Bayesian analysis of proportional hazard models 493–511
LEE, JAEYONG AND KIM, YONGDAI. Bayesian bootstrap for proportional hazards models 1905–1922
LETAC, GÉRARD, MASSAM, HÉLÈNE AND GRACZYK, PIOTR. The complex Wishart distribution and the symmetric group ... 287–309
LI, BING, COOK, R. DENNIS AND CHIAROMONTE, FRANCESCA. Dimension reduction for the conditional mean in regressions with categorical predictors 1636–1668
LIEBERMAN, OFFER, ROUSSEAU, JUDITH AND ZUCKER, DAVID M. Valid asymptotic expansions for the maximum likelihood esti-

mator of the parameter of a stationary, Gaussian, strongly dependent process 586–612
LIJOI, ANTONIO, PRÜNSTER, IGOR AND REGAZZINI, EUGENIO. Distributional results for means of normalized random measures with independent increments 560–585
LIN, TAO AND DE HAAN, LAURENS. Weak consistency of extreme value estimators in $C[0, 1]$ 1996–2012
LING, SHIQING AND MCALEER, MICHAEL. On adaptive estimation in nonstationary ARMA models with GARCH errors 642–674
LINTON, OLIVER B., NIELSEN, JENS PERCH AND VAN DE GEER, SARA. Estimating multiplicative and additive hazard functions by kernel methods 464–492
LIU, XIN AND SHAO, YONGZHAO. Asymptotics for likelihood ratio tests under loss of identifiability 807–832
LOH, WEI-LIEM. On the asymptotic distribution of scrambled net quadrature 1282–1324
LOPUHAÄ, H. P., DE WOLF, P. P. AND GROENEBOOM, P. Kernel-type estimators for the extreme value index 1956–1995
LOW, MARK G. AND CAI, T. TONY. A note on nonparametric estimation of linear functionals 1140–1153
MACKAY, DAVID J. C. AND SKILLING, JOHN. Discussion..... 753–755
MALLAT, STÉPHANE AND CLERC, MAUREEN. Estimating deformations of stationary processes 1772–1821
MALLAT, STÉPHANE AND KALIFA, JÉRÔME. Thresholding estimators for linear inverse problems and deconvolutions 58–109
MARCHESELLI, MARZIA. Asymptotic results in jackknifing nonsmooth functions of the sample mean vector 1885–1904
MASSAM, HÉLÈNE, GRACZYK, PIOTR AND LETAC, GÉRARD. The complex Wishart distribution and the symmetric group ... 287–309
MCALEER, MICHAEL AND LING, SHIQING. On adaptive estimation in nonstationary ARMA models with GARCH errors 642–674
MCNENEY, BRAD, WELLNER, JON A. AND BRESLOW, NORMAN. Large sample theory for semiparametric regression models with two-phase, outcome dependent sampling 1110–1139
MELAS, VIATCHESLAV B. AND DETTE, HOLGER. Optimal designs for estimating individual coefficients in Fourier regression models 1669–1692
MIRA, ANTONIETTA AND ROBERTS, GARETH O. Discussion.... 748–753
MOISAN, LIONEL, MOREL, JEAN-MICHEL AND DESOLNEUX, AGNÈS. Maximal meaningful events and applications to image analysis 1822–1851

MOLCHANOV, ILYA AND HALL, PETER. Sequential methods for design-adaptive estimation of discontinuities in regression curves and surfaces 921–941
MOREL, JEAN-MICHEL, DESOLNEUX, AGNÈS AND MOISAN, LIONEL. Maximal meaningful events and applications to image analysis 1822–1851
MÖTTÖNEN, JYRKI, OJA, HANNU AND KOSHEVOY, GLEB A. A scatter matrix estimate based on the zonotope 1439–1459
MOULINES, ERIC AND FORT, GERSENDE. Convergence of the Monte Carlo expectation maximization for curved exponential families 1220–1259
